Region: (
Population data to be used: 2010 Census Data Projected to 2012						
The LGU Scorecard on Health is an annual survey being conducted by the Department of Health for purpose of identifying reform interventions on health services provided by the LGUs. The indicators are stratified based on the strategic thrusts and strategic instruments of Universal Health Care (Kalusugang Pangkalahatan).						
Instructions:						
 Please fill-up the form by putting the required data for numerator, denominator and computed value. 						
 Encircle "Not Applicable" if the indicator is not applicable to the component city or 						
municipality, or "No Data" if applicable but data is not available.						
Refer to the given formula per indicator to derive the computed value.						
 Fill-up the remarks portion of each indicator when the computed value exceeds the 						
acceptable value.						
Only the computed value will be inputted on the online DCF, however, numerator and						
denominator data still needs to be supplied in this manual DCF to facilitate data						
review.
